

Heathrow's FoH Sanitary Accommodation Doorsets Matrix

ahmarra

August 2014

This document identifies the standard doorsets that shall be selected for Heathrow's FoH sanitary accommodation facilities. 13 individual doorsets are shown as these are the most commonly used doors at Heathrow.

Individual data sheets for each door type are available from ahmarra upon request.

For any instances where FoH doors are either being replaced or where doors are required to be non-standard please confirm your requirements with the Heathrow Standard Owner and ahmarra in order to determine whether other doorsets which are excluded from this document are appropriate.

For BoH accommodation where service and/or plantroom doorsets may be required please select the relevant door from the ahmarra range: 'Service and Plantroom 004b'.

This pack of information shall be read in conjunction with the Heathrow Sanitary Accommodation Asset Standard, Documentum reference: 10000-XX-AM-713-000001.

Heathrow's FoH Sanitary Accommodation Doorsets Matrix
