

MERCANTILE RANGE

MADE TO ORDER BY

ahmarra

WHY SHOULD YOU CHOOSE AHMARRA?

QUALITY

We use the finest materials, cutting edge technology and traditional craftsmanship to guarantee exceptional standards.

BESPOKE

You select the style, the material, and the finish from a wide range of options, creating the perfect look with limitless possibilities.

GREEN

We care about our environment, our materials are FSC® certified and built to last for generations.

BRITISH

Made in Britain to the highest quality standards, our range includes both traditional and contemporary styles to perfectly complement your surroundings, we are proud to fly the flag for UK manufacturing.

ASSURANCE

Our doorsets are third party certified under the Q-Mark fire door manufacture scheme. This comprehensive certification for timber fire doors ensures that performance, production and installation continue to be regularly checked through audit testing and inspections.

MERCANTILE RANGE

Our experience manufacturing performance doorsets for commercial projects has inspired us to develop this robust range of doors that particularly suit areas of heavy footfall such as office buildings, shopping centres and airports.

Our doorsets are made to order on a project by project basis and we focus on providing our customers with the quality of service that we should all expect from our suppliers. Our ability to provide this level of service ensures that our customers return time and time again.

Our aim is to make the entire process as simple and practical as possible, offering solutions to the challenges presented by Building Regulations including performance requirements and complex design issues.

As a specialist in developing customer specific rationalised door sets, our clients have recognised that significant cost savings can be made by offering a uniform finish throughout and eliminating the need to re-define doorsets & ironmongery for every project.

Our ability to offer full product certification in terms of quality and environmental credentials such as ISO 9001, ISO 14001, FSC® (Forest Stewardship Council®) and the Q-Mark Fire Door Manufacturer Scheme has enabled us to meet the supply chain criteria for many of the UK's largest construction companies.

We are a family business that prides itself on offering a quality product and developing long-term relationships with our clients, suppliers and staff. Every team member understands that being polite, enthusiastic and reliable are essential components of what makes Ahmarras successful.

Fire Door
Installation

Fire Door
Manufacture

FIRE RATED DOORSETS FOR UK AIRPORTS

Since 2006, we have supplied and fitted approximately 4,000 fire-rated doorsets at UK airports, predominantly at Heathrow and Gatwick.

Offering Intelligent Advice

As experts in architectural doorset development, manufacture and installation, our experience means we really do understand doorsets. We offer intelligent advice on how to make this process cost effective, simplifying what can be a very complex issue.

FIRE RATED DOORSETS FOR COMMERCIAL PROJECTS

We have a wide range of commercial experience, which includes banks, offices, retail shops, bars and restaurants. Ahmarr offer solutions to the challenges presented by Building Regulations and performance requirements to include a wide choice of options for facings, glazing including screens, fire ratings and acoustic requirements.

KEY BENEFITS OF THIS RANGE

Ahmarra's unique approach aims to make the entire process as simple and practical as possible.

- Tried and tested in heavy traffic areas
- Pre-hung doorsets – door leaf pre-hung in frame
- Pre-defined ironmongery sets included
- Severecore™ severe duty rated door core
- Innovative full height stainless steel push plates with protecting leading edge return
- Integral, interchangeable signage which is flush to the push plate.
- Third-party Q Mark certified fire door
- Full choice of complementary facings and finishes
- Fully aligned ironmongery giving a sleek, professional design

We can offer a cradle to grave service which includes project management through to certified fire door installation.

SPECIFICATION

To aid specification, this range of pre-defined doorsets offer a simple design solution whilst still allowing for options in facings and finishes enabling the specifier to tailor the design to their requirements.

Our aim is to make the entire process as simple and practical as possible, offering solutions to the challenges presented by Building Regulations including performance requirements and complex design issues.

STEEL EDGE PROTECTION PLATES

Our innovative stainless-steel protection plates have proved to be highly successful particularly in the airport sector, where the doors are often subject to daily abuse by luggage trolleys and suitcases.

The plates fully wrap around the edge of the door protecting the leading edge.

As well as the traditional stainless-steel finish, we can also offer PVD steel which is available in a multitude of colours and finishes.

SYNCRONISED IRONMONGERY ARRANGEMENT

Signage, handles and locks are prearranged to feature in-line 100mm backset from the edge of the door. This not only gives the door a more refined finish, but it also allows for plate changing if door plans change on site. Allowing for the change between types of ironmongery.

THE IMPORTANCE OF FIRE DOORS AND THIRD-PARTY CERTIFICATION

Fire doors save lives and protect property, so it is vital that they are manufactured and installed correctly or their fire-resistance can be seriously compromised. Third party certification provides an additional level of assurance of both the level and consistency of performance. It provides an independent, technical process for evaluating and approving systems, activities and doors against a set of defined criteria in standards and procedures.

Q-MARK FIRE DOOR MANUFACTURER SCHEME

Ahmarra are proud to be certified members of the Exova BM TRADA Q-Mark Fire Door Manufacture Scheme. This comprehensive third party certification for timber fire doors provides reassurance to architects, contractors and customers that the doorsets have been manufactured in accordance with test evidence and that performance and production are regularly checked through audit testing and inspections.

The Q-Mark Scheme has been designed to allow firedoor manufacturers to demonstrate that their doors meet the standards required, and to provide ongoing reassurance that their product is fit for purpose. Our Q-Mark certified doorsets are manufactured on a project-by-project basis at our production facility in Portsmouth.

FIRE RESISTANT DOORSET DEVELOPMENT

We specialise in working with clients and architects who recognise the vital importance of developing doorset standards throughout their facilities. Significant client cost savings can be made by eliminating the need to re-define doorsets & ironmongery for each new project.

This includes the unique development of such items as interchangeable push plates, which allow the customer greater flexibility when changing the use of doors. Savings can be made on the cost of replacing the whole door.

CERTIFIED FIRE DOOR INSTALLATION

Q-MARK FIRE DOOR INSTALLATION

We can also offer Q-Mark certified fire door installation via our sister company, Ahmarra Door Installations Ltd (ADIL). ADIL are experts in the installation of certified performance doors under the Q-mark Fire Door Installation Scheme.

ADIL offer full project management for every installation, from initial design through to site installation, every step of the process is carefully managed by our Project Director to ensure that the program runs smoothly, offering expert guidance to our clients.

We provide a highly-skilled team of certified fire door installers; all installers are skilled joiners and carpenters and time-served tradesmen. They are CSCS card holders and have been hand picked to have the right attitude and experience.

Our installers have installed thousands of certified fire doors and they have a wealth of knowledge in the fire door sector.

DOORSET MATRIX

The Mercantile Range has been developed from our many years' experience of manufacturing doorsets for the commercial, office and airport sectors.

We have invested heavily in both the construction of our Mercantile Range of Doorsets, and our electronic technical download – accessible via our website. This details our standard doorset range, with hundreds of variations to suit the area of use for each door type. Our door types will cover the majority of requirements including fire ratings, vision panel variations, lever or pull handles, signage and access control.

To simplify the process of choosing the correct doors for your project, we have created a basic matrix which links to the full specification document

The example shown here demonstrates a standard doorset with options for door types, fire ratings, vision panels and access. The result will then give you the product code for the door type and ironmongery pack.

For more information, and to download the matrix and full specification please visit;

STYLE GUIDE: WOOD VENEER

Real wood veneers offer sustainability, durability, and a natural aesthetic.

BENEFITS

- Natural aesthetic
- Range of colours & grains
- FSC® certified
- Available with 'Hygienilac' lacquer
- Crown or quarter cut

MATCHING SERVICE

We appreciate that you may have a specific laminate, veneer or stained veneer in mind for your doors, perhaps on a piece of furniture. If you can supply us with a sample we may be able to match it for you. We have successfully done this on many occasions, ensuring our customers achieve the finish they desire.

CROWN CUT

Log cut horizontally into flitches

A slicer passes through the log on a plane tangential to these growth rings. The result is a roughly symmetrical, central grain pattern that is characterised by a 'cathedraling' of the grain and also ellipses and ovals. This form of slicing produces an attractive and regular form termed 'crown' veneer.

BOOK MATCH

SLIP MATCH

QUARTER CUT

Log cut into quarters

Quarter cut veneer is straight grained, which allows for continuity to be achieved throughout a project.

SAMPLE SERVICE

Due to the nature of wood, photography may vary and be inaccurate in depicting the uniqueness of veneer and stained veneer. We are happy to provide our customers with samples of our veneers and stained veneers.

FULL RANGE

We are constantly developing new stains and can only represent a small sample of our capabilities in this brochure. We can also offer pre-dyed veneer. If you require more information contact our sales team who will be able to talk you through additional options.
