Fire Door Manufacture & Installation

DECORATIVE FACINGS & FINISHES

Suitable for use on Ahmarra timber doors

Our experience in door manufacturing means that we can help you to create the most suitable and striking door designs for your project. This includes an almost unlimited range of decorative facings and finishes to complement your interior design scheme.

Ahmarra share our customers' concern for sustaining the Earth's resources. Ahmarra are FSC® certified, and as such, all of our doors and frames are manufactured from sustainably sourced timber. We also only use high pressure laminate, wood veneer and primed paper eco veneers that are manufactured using FSC®-certified and other controlled material.

High Pressure Laminates

High pressure laminate is manufactured through fusing multiple layers of impregnated paper under high pressure and temperature to create a hard wearing, durable and hygienic surfacing material. The laminates are then bonded to the core of the door. Laminates are used due to their ease of maintenance and wide range of colours and finishes.

Ahmarra supply laminate from Polyrey® and Formica®. Some of our standard laminate colours are shown below but we are able to supply laminates from most major suppliers in a wide range of colour options. Please contact us for the full range.

Benefits

- Extensive range of trendy designs: 104 decors and 7 textures, including solid colours, wood effects and patterns
- Antibacterial Sanitized® treatment as a standard, eliminates 99.9% of bacteria on the surface
- Highly resistant surface (impact, abrasion, stains, chemicals)
- Nonporous surface: easy to clean and resistant to disinfection protocols
- Volatile organic compounds (VOCs): Greenguard Gold certified
- Suitable for high-traffic public environments

Primed Eco Veneer

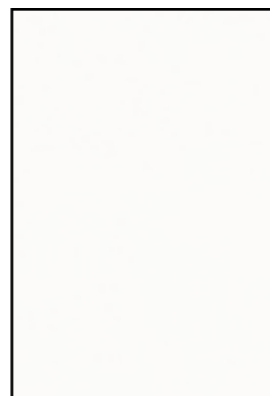

The specially formulated eco-friendly paper veneer is applied to door blanks in the same way as a veneered layon. The pre-primed paper has been designed as a time saving initiative for paint grade doors and is ideal for under-skinning and concealing any lipping ensuring a smoother finish.

Benefits

- Economic
- Surface damage can easily be fixed on site
- Can be painted on-site to match the projects design scheme

Wood Veneers

The use of wood veneer offers unlimited creative possibilities. Even the most difficult and exotic woods can be made architecturally stable as a veneer. You can achieve a perfect, uniform finish whilst avoiding the problems associated with solid wood such as knots, splitting and staining.

Ahmarra offer a wood veneer matching service.

All of our wood veneers are sourced from D. F. Richards.

Glazed luxury apartment doors with an Ebony Ash stained veneer.

Blenheim two panel double doors finished with Woodrow Oak stained veneer, selected from our Artisan Panel Door Collection

Lacquered Paint

A hard wearing pigmented lacquer finish is applied using modern spray equipment.

Colour Matching Service

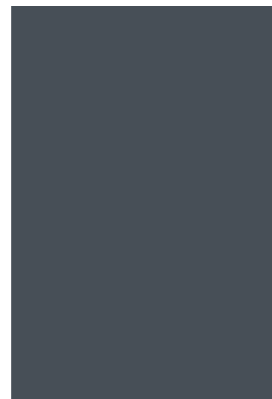

For projects where doors in a specific colour, perhaps to match other elements of an interior design scheme are required, we offer a colour matching service. Provide us with a RAL or similar colour reference, and we will match the colour for you.

PVC

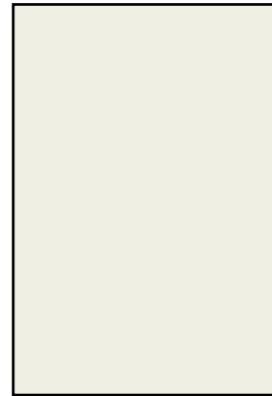

The hygienic 2mm impact resistant PVC door facings include an anti-bacterial additive that is integrated within the sheet material construction, causing 99.9% of bacteria to die within 24 hours, making them ideal for healthcare environments.

The range is available in 15 standard colours in a textured finish, offering a choice of contrasting, co-ordinating and harmonising solutions. Sheets can be applied to doors, door edges and glazing beads, as well as kick plates, frames, stops and architrave.

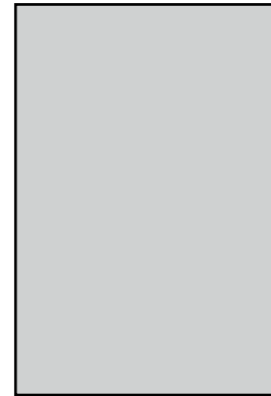

More colour options are available upon request, as well as volatile organic compounds (VOC) free options at a premium.
