DOOR INSTALLATIONS

OUR PROJECT MANAGEMENT SERVICE INCLUDES;

Q-MARK FIRE DOOR INSTALLATION

Fire Door
Installation

We are experts in the installation of certified performance doors under the Q-Mark Fire Door Installation Scheme.

We offer full project management for every installation, from initial design through to site installation and handover. Every step of the process is carefully managed by our Commercial Director and Project Director to ensure that the program runs smoothly, offering expert advice and guidance to our clients along the way.

We provide a highly-skilled team of certified fire door installers; all installers are skilled joiners and carpenters and time-served tradesmen. They are CSCS card holders and have been hand picked to have the right attitude and experience.

THE IMPORTANCE OF FIRE DOORS AND THIRD-PARTY CERTIFICATION

Fire doors save lives and protect property, so it is vital that they are manufactured and installed correctly or their fire-resistance can be seriously compromised.

Third party certification provides an additional level of assurance of both the level and consistency of performance. It provides an independent, technical process for evaluating and approving systems, activities and doors against a set of defined criteria in standards and procedures.

Q-MARK CERTIFICATION

Ahmarra are proud to be certified members of the Exova BM TRADA Q-Mark Fire Door Manufacture Scheme and Fire Door Installation Scheme. This comprehensive third party certification for timber fire doors provides reassurance to architects, contractors and customers that the doorsets have been fitted in accordance with the manufacturers' instructions and test evidence and that performance, production and installation are regularly checked through audit testing and inspections.

Q-MARK FIRE DOOR MANUFACTURER SCHEME

Fire Door
Manufacture

The Q-Mark Scheme has been designed to allow fire door manufacturers to demonstrate that their doors meet the standards required, and to provide ongoing reassurance that their product is fit for purpose. Our Q-Mark certified doorsets are manufactured project-by-project basis at our production facility in Havant.

AIRPORTS

Since 2006, we have supplied and fitted approximately 4,000 fire-rated doorsets at UK airports, predominantly at Heathrow and Gatwick.

We have invested heavily in both the construction of our airport doorsets, and our electronic technical download - accessible via our website. The brochure details our standard doorset range, with hundreds of variations to suit your individual requirements.

This expertise can be extended to similar specifications such as rail stations, offices and commercial properties.

AIRSIDE PASSES AND DELIVERIES

Our company and staff have undergone comprehensive audits and rigorous security checks in order to deliver materials and work airside.

HEALTH AND SAFETY

We are proud to have an unblemished Health and Safety record and take a top down approach to ensuring that all legislation is complied with fully.

We have undergone comprehensive audits and rigorous reviews of our Health & Safety, Environmental and Quality practices and procedures.

A CLIENT FOCUSED APPROACH

We remain focused on providing excellent customer service from inception to completion of your project.

We do this through our tried and trusted management and installation teams, who implement first rate procedures ensuring projects are delivered on time and to the clients' expectations.

We build long term relationships with our clients because we take the time to understand their needs and we treat every job as our passport to future business.

Our experienced team are happy to offer you expert advice, please contact us:

FIRE RESISTANT DOORSET DEVELOPMENT

We specialise in working with clients and architects who recognise the vital importance of developing doorset standards throughout their facilities. Significant client cost savings can be made by eliminating the need to re-define doorsets & ironmongery for each new project.

This includes the unique development of such items as interchangeable push plates, which allow the customer greater flexibility when changing the use of doors. Savings can be made on the cost of replacing the whole door.

MANUFACTURING CAPABILITIES

We have significant manufacturing capability through our sister company, Ahmarra Door Solutions.

As a specialist manufacturer of performance doorsets; Ahmarra have combined the latest CAD design, CNC precision machinery and fine craftsmanship to guarantee the very best standards in door manufacturing.

Ahmarra doors offer flexibility in design whilst retaining comprehensive fire certification in accordance with building regulations.

Our ability to supply doors using metal, laminate or specially selected matching veneers, presents designers with a wide range of themes and possibilities.

AHMARRA DOOR INSTALLATIONS ARE PART OF THE AHMARRA GROUP OF COMPANIES WHICH INCLUDES:

AHMARRA DOOR SOLUTIONS LTD

A specialist manufacturer of performance doorsets.

AHMARRA INSTALLATIONS LTD

A highly skilled and experienced specialist joinery installation service.
