A range of rationalised doorsets, designed to streamline the order process

Version 1.3 | 19-06-2024

Fire Door Manufacture

Our Quick Service Doors are a rationalised range of pre-hung bespoke doorsets, suitable for projects of between 10 and 30 doors.

This brochure seeks to simplify the options, streamlining the process with materials stocked and ready to go. This range is designed to eliminate the usual RFI's so that your performance fire doorsets can be delivered with a reduced lead-time.

Follow the simple steps and complete the form at the back of the brochure by using the drop-downs to select the options code and email it to <u>sales@ahmarra.co.uk</u> for a fast-track quotation.

WHY SHOULD YOU CHOOSE AHMARRA?

- QUALITY We use the finest materials, cutting edge technology and traditional craftsmanship to guarantee exceptional standards.
- GREEN Ahmarra care about the environment, as such, we are FSC® certified and hold ISO 14001 certification for our environmental practices. Our wood waste is converted into heat for our production facility in our biomass boiler. Our local forest planting scheme has meant thousands of plants and trees have been planted as a result of our donations.
- BRITISH Made in Britain to the highest quality standards, we are proud to fly the flag for UK manufacturing.

YOUR DOORSET WILL INCLUDE:

Pre-hung doorset

Single doors will arrive fitted on its hinges and perfectly fitted into its frame. Double doors will arrive with frame assembled but doors removed for manual handling purposes (unless door only ordered)

- Architrave and stops supplied loose
- Hinges, intumescent, drop seals (if acoustic or smoke controlled door) fitted at works
- Plugged to confirm Q-Mark Fire Door Manufacture scheme certification
- Palletised and express delivered to your project
- Full set of installation instructions
- Ironmongery is not included (other than our tested hinges), but can be supplied separately upon request

BM TRADA Q-MARK CERTIFICATION

The Importance of Fire Doors and Third Party Certification

Fire doors save lives and protect property, so it is vital that they are manufactured and installed correctly, or their fire-resistance can be seriously compromised. Third party certification provides an additional level of assurance of both the level and consistency of performance.

Q-Mark Fire Door Manufacturer Scheme

Ahmarra are proud to be certified members of this comprehensive third party certification scheme. Q-Mark has been designed to allow fire door manufacturers to demonstrate that their doors meet the standards required, and to provide ongoing reassurance that their product is fit for purpose. Performance, and production are regularly checked through audit testing and inspections.

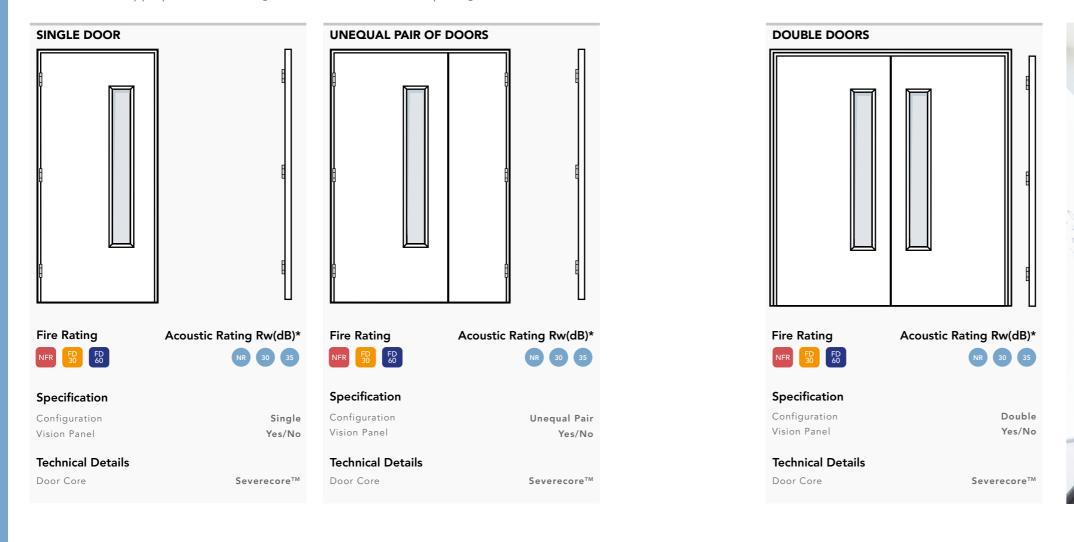

Doors can also be supplied and morticed only for one of our lock cases, or flush bolts on double doors (if required)

Fire Door Manufacture

QUICK SERVICE DOOR CONFIGURATIONS

Select the most appropriate door configuration for each structural opening.

Δ

CODE 1: DOOR CONFIGURATION

SINGLE	UNEQUAL PAIR	EQUAL PAIR
S	U	E

CODE 2: FIRE RATING

NON-FIRE RATED	FD30	FD60	FD30 SMOKE CONTROL	FD60 SMOKE CONTROL
NFR	FD30	FD60	FD30/S	FD60/S

Ensure each door has the correct fire rating associated, NFR, FD30 or FD60. This should be derived from the building's fire strategy, by a professional.

FD30 and FD60 doors are also available with smoke control. Smoke controlled doors will have a drop seal fitted.

When doors only are ordered intumescent is not supplied, machined or fitted by Ahmarra.

CODE 3: ACOUSTIC RATING

NON-ACOUSTIC RATED	30 RwdB	35 RwdB
NR	30	35

If noise reduction is required, please select the appropriate acoustic rating.

All acoustically attenuated doors require a drop seal and will also be fitted to smoke controlled doors allowing an 8mm gap below your fire door which will be sealed when door is in

closed position

Design Considerations

FACINGS & FINISHES

Frames will be pre-primed. Doors can either be primed for on-site painting or factory finished with high pressure laminate selected from the options below.

PRIMED ECO-VENEER Ready Primed Eco-Veneer suitable for on-site painting. Benefits - Economic Surface damage can easily be fixed on-site - Can be painted on-site to match the project's design scheme

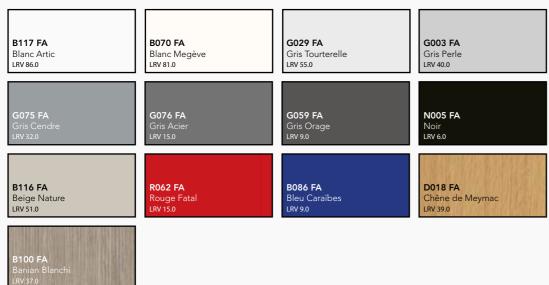

HIGH PRESSURE LAMINATE

Ahmarra supply laminate from Polyrey®.

Benefits

- Highly resistant surface (impact, abrasion, stains, chemicals)
- Nonporous surface: easy to clean and resistant to disinfection protocols
- Antibacterial Sanitized® treatment as a standard, eliminates 99.9% of bacteria on the surface
- Volatile organic compounds (VOCs): Greenguard Gold Certified
- Suitable for high-traffic public environments

The laminate is available in 13 colour options. We keep stock of these standard colour options;

Standard vision panel style details, DDA compliant to BS 8300:2009.

CODE 5: VISION PANEL

Choose whether you would like your doors to feature a vision panel.

NO APERTURE	STANDARD VISION PANEL
None	VP01

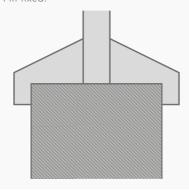

LIPPINGS & GLAZING BEADS

Lippings All doors from Ahmarra are lipped

all around. Laminate faced doors will be lipped in American White Oak (semi-concealed as shown).

Bolection Bead

Hardwood bolection bead (cloak bead) will also be in American White Oak, where laminate, to match the lippings. Pin fixed.

Vision panels allow users of the building to view what is on the other side of the door and are an important safety feature, vital in preventing injury resulting from collision with opening doors.
